

PATIENT QUESTIONS:

Check-up after Hospital Stay for Cystic Fibrosis Flare-up.

Patients need a check-up in our clinic within 2 to 4 weeks after a hospital stay for a cystic fibrosis flare-up.

If you have ever been in the UAMS Hospital for a cystic fibrosis flare-up, your ideas could help us improve patient care.

Thank you for your time and input!

Part 1: Reasons for not having check-up 2 to 4 weeks after hospital stay.

Score 0 to 4 for each reason as it applies to you. Mark box to score each reason.

Reasons for having check-up later than 2 to 4 weeks after hospital stay	Not at all important 0	1	2	3	Very important 4	Comments
Long way from home to clinic						
I thought it would cost too much						
I did not think it was needed						
I did not know when to come in						
Clinic hard to reach by phone						
Clinic was full so I couldn't get in						
Other reasons or comments:						

Part 2: Ways we could help you with check-up after hospital stay.

Score 0 to 4 for each way we might help as it applies to you. Mark box to score each one.

Ways we might help	Not at all helpful 0	1	2	3	Very helpful 4	Comments
Set clinic visit before I leave hospital						
Give me more info about why this matters						
Other ways we could help or comments:
